

3M™ SecureFit™ 500 Series Safety Glasses

Contemporary lens design with adjustable ratcheting temples.

3M™ SecureFit™ 500 Series features a contemporary lens design coupled with adjustable ratcheting temples and Pressure Diffusion Temple (PDT) technology to help provide a more personalised fit. Utilising a contemporary lens shape, this sporty new model also offers self-adjusting coloured temples, a variety of lens tints and models with Scotchgard™ Protector Anti-fog coating.

Adjustable ratcheting temples

Allows user to adjust lens for facial features and eyeglass position.

3M™ Pressure Diffusion Temple Technology

Features slotted ribs that provide comfortable pressure equalisation. The temples flex and self-adjust to the size of wearer's head.

Removable foam-lined gasket

Helps limit eye exposure to dust and debris while providing added comfort and cushioning.

Polycarbonate lenses

- ▶ Polycarbonate lenses labelled UV400 absorb 99.9% of UVA, UVB, and UVC rays between 200 nm and 400 nm
- ▶ Meets the impact-rated protector requirement of the EN 166:2001 Standard

Slim standout style

Sporty design with contemporary lens shape and a sleek profile of safety glasses that can combine well with other personal protective equipment.

3M™ Scotchgard™ Protector Anti-Fog/Anti-Scratch Coating

- ▶ Resist fogging longer than traditional anti-fog coating, up to 25 washings with water (select models)
- ▶ Helps provide durable scratch resistance (K) in tough work environments
- ▶ Meets Anti-Fog Performance (N) requirements of the EN 166:2001 Standard

- ▶ The adjustable ratcheting temples of the 3M™ SecureFit™ 500 series are designed to help improve the positioning of the eyewear when worn with half-mask respirators
- ▶ The 3M™ SecureFit™ 500 series has a flat and flexible temple design which combines well with 3M™ Protective Earmuffs
